## THE CAPE OF GOOD WINES

### CAPE LEGENDS WINE PORTFOLIO

The Cape winelands is blessed with varying topography resulting in an array of meso and micro climates creating unique "terroirs" for quality grapes, the basis of all fine wines.

The Cape Floral Kingdom (CFK) was demystified as the "smallest and richest plant kingdom on earth". Key factors being variety, concentration of species and high levels of endemism. There are more plants in the CFK than the entire Northern Hemisphere (Boreal Kingdom). Cape Town is the most biologically diverse city in the world with more species of plants on Table Mountain alone (2200) than the greater United Kingdom.

This diversity is echoed in the wines of the Cape, offering both the connoisseur and the layman a wine for every occasion.
